

Command List for DxNet:

~~~~~

|                                |                                                   |
|--------------------------------|---------------------------------------------------|
| SHoW/Announce                  | Announcement list                                 |
| SHoW/Beam <locator>            | Show azimuth/distance                             |
| SHoW/BAse or /DATAbase         | Available Databases on this cluster               |
| SHoW/CLuster                   | Short Cluster configuration                       |
| SHoW/Configuration             | Cluster configuration                             |
| SHoW/Date                      | See the current date                              |
| SHoW/DX                        | See the 5 last spots                              |
| SHoW/DX/n [band] [prefix]      | See the n last spots (see detailed help: ? SH/DX) |
| SHoW/Filter                    | See the DX announcement status                    |
| SHoW/LANGuage                  | Language list                                     |
| SHoW/Prefix <prefix>           | Search the DXCC database                          |
| SHoW/STation <callsign>        | Display information for the station call          |
| SHoW/Time                      | Show the current time                             |
| SHoW/Users                     | Local cluster configuration                       |
| SHoW/USERCmd                   | Display the commands executed at logging          |
| SHoW/WWFilter                  | Show your WW filter status                        |
| SHoW/WWV                       | Display WWV propagation information               |
| SET/BEep [d] [a] [t] [l] [w]   | Enable BEEP alerts                                |
| SET/DX_ announcements          | Enable the DX announcements                       |
| SET/Filter <...>               | Enable a DX announcement filter                   |
| SET/Here                       | You're here                                       |
| SET/NOHere                     | You're away                                       |
| SET/HOME <cluster_call>        | Set your home cluster                             |
| SET/LANGuage <num_language>    | Set the language (see sh/lang)                    |
| SET/LOCator <locator>          | Set your locator                                  |
| SET/LOGIn                      | Enable login/logout messages                      |
| SET/NAME <name>                | Set your first name                               |
| SET/NOBeep [d] [a] [t] [l] [w] | Disable BEEP alerts                               |
| SET/NODX_ announcements        | Disable the DX announcements                      |
| SET/NOFilter                   | Disable the DX announcement filter                |
| SET/NOLogin                    | Disable login/logout messages                     |
| SET/NOwwfilter                 | Disable the WW announcements feature              |
| SET/QTH <city>                 | Set your QTH                                      |
| SET/USERCmd                    | Set the commands which are executed at login      |
| Announce <msg>                 | Send a local announcement                         |
| Announce/Full <msg>            | Send a cluster-wide announcement                  |
| Bye (or Quit)                  | Quit                                              |
| CONFerence                     | Enter the local conference                        |
| CONFerence/Full                | Enter the cluster-wide conference                 |
| CONVert/L2C                    | Convert a locator to coordinates                  |
| CONVert/C2L                    | Convert coordinates to a locator                  |
| DX <freq> <dxcall> [comments]  | Send a DX spot [freq is in Khz]                   |
| EU                             | Edit user information                             |
| Information                    | Display the informations about the server         |
| Kill <#>                       | Kill a message                                    |
| List                           | Show the new messages                             |
| LL <#>                         | Show the last # messages                          |
| LM                             | Show the whole message addressed to me            |
| LN                             | Show the new mail messages addressed to me        |
| L> <recipient>                 | Show all messages addressed to <recipient>        |
| L< <sender>                    | Show all messages sent by <sender>                |
| LS <title>                     | Show all message containing <title> in title      |

|                              |                                    |
|------------------------------|------------------------------------|
| Read <#>                     | Read a message                     |
| Send <callsign>[@cluster]    | Send a message                     |
| Talk [callsign]              | Send a break message to [callsign] |
| WWV <SFI> <A> <K> [comments] | Send a WWV propagation information |

Other Help:

|                      |                                                 |
|----------------------|-------------------------------------------------|
| Access to Databases: | Enter ? BASE for help on the Databases          |
| Messaging commands:  | Enter ? MSG for help on the messaging commands. |

You can obtain a detailed help about any command by typing:  
? [cmd] (example: ? SH/DX or ? SH for extra help on all SH/xxx)  
A command can be shortened by using only the letters shown in capital.

his command displays the liste of the #n last spots.  
The band and/or the prefix may also be specified.

The default value of (#n) is 5

Example:

|            |                                                   |
|------------|---------------------------------------------------|
| SH/DX      | (5 last DX spots)                                 |
| SH/DX/10   | (10 last DX spots)                                |
| SH/DX 40   | (5 last DX spots on the 40m band)                 |
| SH/DX 2 PA | (5 last DX spots with PA stations on the 2m band) |
